PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in Power BI, SQL, Excel, and Python. Demonstrated ability in ETL processes, data modeling, DAX, and building interactive, business-driven dashboards. Proven capability through practical virtual internships and structured training in data visualization and analytics frameworks. Eager to contribute strong analytical thinking and technical skills to drive data-driven insights.

TECHNICAL SKILLS

Business Intelligence & Visualization: Power BI, Power Query, DAX, Data Visualization, Dashboard Development, KPI Reporting

Databases & Querying: SQL, MySQL

Programming & Libraries: Python, Pandas, NumPy

Data Analysis Tools: Microsoft Excel (Pivot Tables, XLOOKUP, INDEX-MATCH, Conditional Formatting)

Core Methodologies: ETL, Data Cleaning, Data Modeling, Cybersecurity Threat Analytics, Business Scenario Framing

EXPERIENCE & PRACTICAL SIMULATIONS

Data Analytics Intern | CodeAlpha (Virtual Internship Program)

May 2026 – June 2026

- Engaged as an active participant in dedicated data analytics project tasks, completing milestones focused on core analytics workflows.
- Applied data processing methodologies to interpret datasets and support reporting requirements.

Data Visualisation Simulation Participant | Tata (via Forage)

May 2026

- Completed practical simulation tasks titled "Data Visualisation: Empowering Business with Effective Insights."
- Practiced framing complex business scenarios to select the right visual formats for effective stakeholder communication.
- Created impactful visual dashboards focused on communicating analytical insights to drive business decisions.

PROJECTS

Retail Sales & Customer Intelligence Dashboard

Tools: Power BI, SQL, Excel

- Built an interactive end-to-end sales dashboard in Power BI utilizing datasets cleaned and transformed via Power Query.
- Authored custom DAX measures to calculate metrics for Sales, Profit, Growth percentages, and specific customer KPIs.
- Designed functional user-interface features including drill-through pages, custom slicers, and KPI cards to optimize reporting readability.

Cybersecurity Threat Analytics Dashboard

Tools: Power BI, SQL, Python

- Analyzed and manipulated the comprehensive CICIDS2017 cybersecurity dataset using Python (Pandas) for data preprocessing.
- Developed visualization dashboards to monitor operational network traffic anomalies and attack trend vectors.
- Engineered visual reporting structures tracking threat severity distributions and attack patterns to aid risk mitigation.

EDUCATION

B.Sc. in Computer Science (Security Systems) | Subbalakshmi Lakshmipathy College of Science, Madurai Expected May 2027

CERTIFICATIONS & TRAINING

- Information Technology Specialist in Python – Certiport / CertNexus / Pearson (March 2025)
- 30 Days MasterClass in Data Analytics – NoviTech R&D Private Limited (June 08, 2026 – July 11, 2026)
- Data Analytics Seminar / Webinar – Brand Monk Academy / NSDC (June 13, 2026)

LEADERSHIP & ADDITIONAL SKILLS

Leadership: Department Student Association Secretary

Soft Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Time Management

Languages: English, Tamil
